Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5, 10-16, and 21-24 are rejected under 35 U.S.C. 102(a) as being anticipated by Senga et al. '895.

Referring to claims 1-5, 12, 13, 21-24, Senga et al. discloses a CMP apparatus for polishing a substrate to be polished by CMP, the CMP apparatus comprising: a rotatable stage selectively holding a substrate to be polished (12b); a polishing head (2) holding section that holds a polishing head equipped with a polishing pad over the stage; a storage section (column 11, lines 41-44) that stores a replacement polishing head equipped with polishing pad; and a head replacement mechanism that replaces the polishing head by the polishing head holding section with the replacement polishing head stored in the storage section; the storage section includes storage chambers that store replacement polishing pads; and the storage chambers are mutually portioned such that slurry and contaminants are prevented from crossing from one storage chamber to another; a load-unload chamber (column 9, lines 20-25) that is disposed over the turntable for mounting and removing the substrate to be polished on and from the stage; and the polishing pad has a diameter smaller than a diameter of the substrate to be polished.

Referring to claims 10, 11, 14, 15 and 21-24, Senga et al. inherently discloses the method steps for manufacturing the semiconductor device.

Allowable Subject Matter

Claims 6-9, and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Grant whose telephone number is (703) 305-3315. The examiner can normally be reached on Mon-Fri 8:00-4:30.
